NEW !!

P ^{paper} ROMA ^P PRINT	
Temperature	150 to 160° C
Time	10 to 15 s
Peeling	Tepid / Cold
Thickness	120 microns
Washing	60° C
Packing	128 cm x 24.38 ML
Ink	ecosolvent, solvent & inkjet

Note: for all our materials, we recommend to store it away from direct sunlight, high temperature and humidity (below 25°C and humidity of 50%)

Print the design in standard pattern (without mirror effect). Cut around the printed design with a cutting plotter (using a flex blade), and then detach the printed film from its paper base. Thread the tee-shirt into the press, then put the PromaPrint Paper sheet on (printed side over), and protect the printed area thanks to the included greaseproof paper. Open the press, let the tee-shirt cool down, remove the protection sheet: your transfer is finished.

→ To transfer several designs all in one, use a tape paper to collect it in one time. Apply the tape and logos on your textile. Cool it and then, take the paper off.
